COMPANY PROFILE

THE FACTORY OF THE WORLD

MADE IN
INDIA

When it comes to global fashion manufacturing output, India's share is the greatest. Producing 90 percent of the world's shoes and apparel, exporting over 73 percent of the world's clothing, India has become indispensable for designers, brands and retailers across the globe from fast fashion to luxury.

Given the fact India now produces nearly eight times more. the old guards across the fashion capitals grudgingly concede that much of the fashion system would grind to a halt without India supply chains.

OUR FOUNDATION AND WORK PROCESS IS BASED ON

VISION

To be an international market leader in the growing & fast fashion industry.

MISSION

Providing *desirable fashion apparel and accessories* for men, women & kids *Quality service* by professionally trained team members, *Outstanding value* through our strong and direct logistic links with manufacturers, and finally *convenience* through our network of partner retailers and wholesalers across the world, our *valued customers* will always be at the *heart* of our business.

Trendy Fashion + Quality Service + Outstanding Value + Core Values

Specific Team's Responsibility

- **Order execution and Quality Control :**
- Orders are closely monitored from sampling to shipment. Status on sampling, production and shipment are transmitted to buyers regularly. We maintain a pro-active approach towards identification of problem areas and corrective measures are taken immediately to ensure timely deliveries. Our quality monitoring system pertaining to production has four stages as explained below :
- **Pre Production Check (PPC)**
- Risks are reduced by checking material components, accessories / user manuals etc. at this stage itself.
- **Initial Production Check (IPC)**
- First finished products are checked
- against buyer's specification and prototype sample. Deviations are identified and brought out for correction.

Specific Team's Responsibility

During Production Check (DUPRO)

Inspection during production is carried out to check and verify that the initial discrepancies have been rectified and to ensure the average quality standard of production runs.

Final Random Inspection (FIR)

Final random inspection is carried out when the total consignment is packed and ready for shipment. FRI is performed according to the International Inspection Standards.

The detailed physical inspection of the samples selected at random is based on specifications of the buyers and it covers the criteria such as design / style, shrinkage, accessories, appearance, markings, color, labeling, material, assortments, workmanship, measurements, packing etc.

Quality Management Systems

We completed our ISO certification process in 2020. So you may rest assured that we will always thrive to achieve high standards of quality.
